

# Did you know,

## P&L provide much more than consultancy...

Successful farm management leads to farm profitability. The quality of decisions made have a direct and significant effect on that profitability. P&L exist to help farm businesses make good decisions and work with them to achieve profitable results.

Several factors influence the overall success of a farm business - operating strategy, cost management, utilisation of resource, environmental stewardship, diversification and many more. The P&L team is just as diverse, with plenty of experience in all aspects of farm business. It is this combined, wide ranging diversity which makes P&L such a valuable resource to farm businesses.

### The Energy Resource

With fossil fuels depleting and energy consumption increasing, agriculture is playing an important part in the foundation of a sustainable energy future. The use of agriculture to provide a sustainable, long-term, alternative energy resource is real and achievable. Talk to P&L about your energy resource and discover the opportunity within your farm business.

Whatever your farm business needs, P&L are there to provide advice and support, helping you towards a sustainable and more profitable future.
